

HW#12

Look carefully to the OOP Zoo-Diagram Below then Create Python Project Contain necessary Classes as shown in diagram

- The required properties and method in each class described in diagram ,in addition each one has a `info()` method to print out data of the object
- The parent class must have (`Num_of_Animal`) property to give the total number of animal in the zoo
- The implementation of methods in diagram is up to you
- Do not forget to test the instances of build classes
